OVERVIEW

Blackjack is one of the world's most popular casino games.

Blackjack is the American member of a global family of banking games known as Twenty-One. It is a comparing card game between one or more players and a dealer, where each player in turn competes against the dealer. Players do not compete against each other. It is played with one or more decks of 52 cards, and is the most widely played casino banking game in the world with origins dating back to the 17th century, it is enjoyed by gamblers in practically every casino out there.

RULES

The objective of Blackjack is to achieve a higher card count than the game presenter, but without going over 21. The best hand is Blackjack – when the sum of the values of the first two cards dealt is exactly 21. Players compete only against the game presenter, not against other players.

Played with 8 decks.

Game presenter always stands on 17 (soft or hard).

Double down on any 2 initial cards.

No Double option after player has Split the two initial cards.

Hand receives only one additional card after doubling down.

Player can Split two identical value cards 1 time per position per round.

Single card dealt to each Split Ace.

Insurance offered when game presenter shows an Ace. The insurance bet size is always half the original wager.

Making Ace and 10 after splitting counts as 21, not Blackjack.

Any two cards with the same value can be Split.

Blackjack pays 3:2.

Insurance pays 2:1.

Push game upon tie. Main bets are returned to the player if the positions push (BJ is better than 21).

SIDE BET RULES

Regular Blackjack bet must accompany Perfect Pair bet.

Perfect pair means that the two first initial cards are exactly the same rank and same suit.

Colored pair means that the two first initial cards are same rank and same color (Diamond and Hearts or Spades and Clubs).

Non-colored pair is just any two first initial cards that are the same rank.

INTERFACE ELEMENTS

The menu button opens the main menu.

The settings button allows the Player to change game settings (Player's nickname, game client sound, and the game presenter voice, the video quality, game type, and the language).

The "checkmark" button allows the Player to accept the insurance offer.

The "cross" button allows the Player to decline the insurance offer.

The undo button removes the last bet Player placed.

INTERFACE ELEMENTS

The join button allows the Player to join the selected table.

The star button allows the Player to select or unselect favorites tables in the lobby.

The chat button allows the Player to send messages to the game presenter and chat with the other players. The player may use chat only when the bet is placed.

The leave seat button allows the player to leave the seat.

The take a seat button allows the Player to occupy any vacant seat. When the seat is taken by the Player, the Player's name is displayed beneath the seat. Players can occupy several seats at tables that permit this option.

The rebet button allows the Player to repeat all bets from the previous game round. This button is available only before the first chip is placed.

The 2x rebet button allows the Player to double any already placed bet or repeat the bet from the previous round game and double it. Each button press doubles all Player's bets up to the maximum limit.

INTERFACE ELEMENTS

PLATFORMS

Our new live dealer product is optimised for the full range of devices, and can be enjoyed on smartphones, tablets and desktops of almost any model, suitable for players in a wide range of different regulated markets.

Like the rest of our offering, it fuses sharp mobile-first designs combined with intuitive single-touch interactivity.

Compatible with

iOS

Android

Windows

Mac OS

HTML5
