Wins are awarded for adjacent symbol combinations as potential prizes are granted for matching three in a diagonal or horizontal row from left to right, with higher dice scores leading to greater rewards. Players achieve higher payouts with a higher frequency of dice scores. For instance, rolling three ones generates a prize of x3 your stake, and rolling 9 sixes receives a maximum x54 your stake. Spinning one or more red diamond symbols in the centre position of each game triggers the Quest Bonus. The more diamond symbols you gain, the more rolls of the dice you get in that bonus round.
