Players can bet on Player A and Player B (or a Tie), as they might in Baccarat. The Game is played with one digital deck composed of 52 cards.

The game also offers additional side bets. For example, 3 cards dealt to hand A and 3 cards dealt to hand B combine to create the best possible 5 card hand. The 6 Card Bonus bet may win or lose regardless of the outcome of the main bet.

Another game version is played against the dealer. There are no side bets, but the game introduces 'Blind' bets, where the player can raise the bet when cards are face down for a larger payout.
