

PAWSOME PLINKO

The cat's outta the bag and claws are out for the latest OneTouch title, **Pawsome Plinko**: a classic ball drop game with a range of features and massive base game multipliers!

In the base game, watch as balls of yarn tumble and ping toward the landing slots in traditional fashion. Special golden-starred pegs throughout the game can attach extra multipliers of up to 100x to the tumbling balls as well as split the ball into two and even award Free Drops!

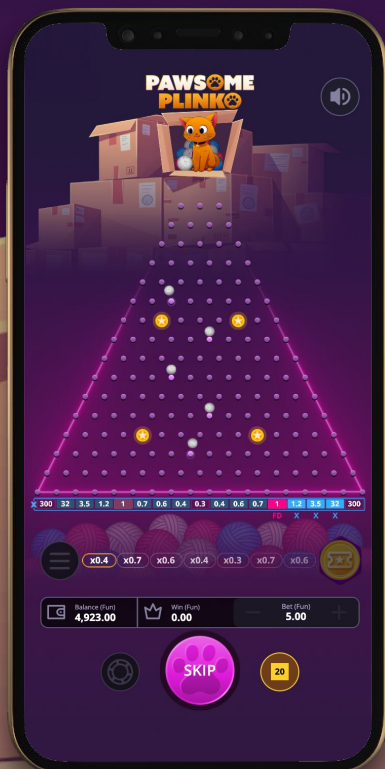

Free Drops will be activated when pink balls land in their corresponding pink slots...

That's where the feline fun begins, meeeaaaooowww!

A new collection system appears beneath the game's slots connoting more balls or more global multipliers! By collecting six (6) balls in one slot, the corresponding number will be added to either the multiplier or balls remaining counter.

Here the peg functions as it does in the base game to potentially split a ball in two for more chances to win. But that's not all...

The starred peg can also turn the ball in a Mystery Ball! This can result in either additional balls or more multiplier when they land resulting in a potential max win of 10,000x your bet!
